Jolly-boat (dʒǫ·libǫt) [Known only from 18th c origin uncertain

It has been supposed to be a perversion of Jollywat or *gellywatte*, an earlier name app for the same or a similar ship's boat of small size. On the other hand the first element bears a strong (written) resemblance to a name (of unknown origin and uncertain age) applied to small boats of various kinds in many Teutonic languages e g Du *jolle* (yolle), Sw *jol, jolle, julle*, Da *jolle, jolde, jolle, galle* (in Bischer 1741 *jol or jolle*, Brem Wtb *jolle*, E Fris *jôl, jölle*, Wang (-*ŏ*), Du *jol* 1682 in Winschooten, Heilam, 1698, has the dim *jolletje* 'small bank or boat') But in all these langs the *j* is = Eng *y*, and the actual corresponding word is E *yole* Eng *yoke* (An alleged F *jol, jolle*, seems only to be the Teutonic word mentioned as a foreign word in an *Encyclopédie* of the 18th c) Hence the exact historical relations of these words remain inscrutable]

[*Note* The etymology of *jolt* vb and sb, and their derivatives, and of words apparently allied in form and sense, is in the present state of the evidence, involved obscurity and difficulty *Jolt head* is known in 1533, *jolt headed* (in the form *cholt headed*) in 1552, *jolting pate*, app in the sense of *jolting head*, in 1599, and while the simple vb and sb *jolt*, are not known till 1599 But *jort*-*head*, largely identical in sense with *jolt*, is quoted at least from 1530, and may be a century earlier Sense 1 of *jolt*, both in sb and vb, has evident affinities with *jolt*, Jowl *sb*1, *v*1, and perh with Jowl *sb*2, but the other senses of *jolt* vb coincide with those of *jowl* vb *Jolt* has thus the appearance of an alteration of *jowl*, influenced by *jowl*, and perh by *jolt head*, which latter is evidently related in some way to Jowl *sb*2 or Jowl *sb*1 The form *choll headed* recalls the dialectal form of the latter (Cf also the mod dial *cholter*, *chowter headed* Jolter headed) It has been suggested that *jolt head* may have been a phonetic variant of **joult* or **jowld head*, and that *jolt* vb was a back formation from it, perh through *jolting pate* but this has obvious difficulties, phonetic and semantic. Further evidence may harmonize facts, which are at present somewhat contradictory]

Conjectured by some to be a corruption of Sp. and Pg. *ajo, ajo y, galiota*, Du. *galjoot* (Galliot). But this is extremely doubtful. It is difficult to comprehend how *galeota* could be transformed into *jolyrast*, and the *things* differ even more than their *names*, for the *galliot* was an independent vessel with sails and many rowers, while the *jolyrast* was a ship's boat of small size It is true that the Pg. *galeota* appears to have become *galleyrast* or Galliyat, in the East Indies, but this, like the original, was a vessel of 80 or 90 tons with sails and 40 or 50 rowers, carrying sometimes 8 guns — a very different thing from the *jolyrast*, to say nothing of the impossibility of any connexion between an Indo-Portuguese word and an English word before 1500. The variation *jolly, gelly*, remains unexplained. Neither form of the Scandinavian and Low German word *jol, jolle, gelle*, cited under Jolly boat, but the evidence for this as yet does not carry us back to the 16th century.

Jonathan (dʒɒ nǎþăn) [A personal name, orig. that of the son of Saul, king of Israel]

1. (esp in phrase *Brother Jonathan*) A generic name for the people of the United States, and also for a representative United States citizen.

Understood to have originated in the expression *Brother Jonathan* (cf. 2 Sam. I. 26), said to have been applied to Jonathan Trumbull, Governor of Connecticut, by General Washington, who often sought his advice. Hence it is believed to have been applied at first to a New Englander, and at length to the whole people.

The suggestion has been made that *Jordan* is short for *Jordan-bottle*, and meant orig a bottle of water brought from the Jordan by travellers or pilgrims, rather than was thence transferred to a pot or vessel used by physicians and alchemists, and thence to the chamber utensil. But the earlier steps of this conjecture appear to rest upon nothing, but the later form of the word (which may actually be a corruption of something else), and the external probabilities of such an origin. It is remarkable that, though the early accentuation and spellings indicate a French origin, no trace of the word has been found in Old French, nor does the med.L. *jordanus* appear to be known outside England. The river Jordan is in I. *Jordanes*, a word necessarily familiar to the author of the *Promp Parv* and other glossarists, who used not only this, but *jordanus* for the pardon.]

†1 A kind of pot or vessel formerly used by physicians and alchemists *Obs*

As figured in Sibane MS 73, and elsewhere, it is somewhat the shape of the bulb of a retort, or of a Florence flask, with the neck out off midway between the bulb and the mouth, and the top expanded somewhat to a rim. Possibly it was often used to hold urine for purposes of diagnosis, which would naturally lead to sense 2. Skeat puts the Chaucer example in sense 2

The origin of the *j*, first in JOWL *sb*[3], and then in JOWL *sb*[2] and 3, is at present unaccounted for, there is no OF or other Romanic word to the influence of which it can plausibly be referred This, with the obscurity which attaches to the origin of JOWL *sb*[2] and JOWL *sb*[3], and the fact that all are in recent use levelled under the form *jowl*, makes the group a very puzzling one]

4 Here perhaps belongs the phrase *Cheek by jowl*, in earlier usage *cheek by cheek* see CHEEK *sb* 5

In this the *j* form is known from 1577, which is somewhat earlier than it is known in sense 1 above The 17th c variants *cheek by chole*, *chowl* agree in form better with JOWL *sb*² or ³ But it is probable that, by the time the phrase came into use, all three sbs were already felt as one The following examples supplement those under CHEEK

1 A public officer appointed to administer the law, one who has authority to hear and try causes in a court of justice

As a generic or descriptive term, *judge* is applicable to any person occupying such an offi ial position but by usage, it has, in the United Kingdom, become much restricted as a particular designation, collectively, the members of the Supreme Court of Judicature are 'His Majesty's Judges' so we say 'the Judges of the Supreme Court', 'Common Law Judges', Chancery Judges', 'Equity Judges', 'Judges of Assize or of the Circuit Courts', but individually these are mostly styled (Lord, or Mr) JUSTICE (q v) In Scotland, the Judges of the Court of Session and High Court of Justiciary are individually styled LORD Certain judges have other special designations, as 'President', 'Recorder', etc But the name is regularly given in England to the presiding officer of a County Court, who is officially styled 'His Honour Judge A——' The persons presiding judicially in inferior courts are usually called 'Justices' or 'magistrates In the United States 'Judge' is more widely applied to the presiding officer of any judicial court below the Supreme Court, to which the official name is 'Justice' (see b below). Judge' is also more used as a designation in some British colonies or dependencies Historically, the name is given to certain noted persons as 'Judge Gascoigne', 'Judge Jeffreys

1 In legal use
1 A company of men sworn to render a 'verdict' or true answer upon some question or questions officially submitted to them, in modern times, in a court of justice, usually upon evidence delivered to them touching the issue, but in the earliest times usually upon *facts or matters within their own knowledge*, for which purpose they were summoned from the neighbourhood to which the question submitted to them related, or in which the person or persons lived as to whose conduct or death an 'inquest' or investigation was held,
Originally, 'The question to be addressed to them may take many different forms: it may be whether the one which has arisen in the course of litigation, it may be a question of fact or a question of law, or again what we should now a days call a question of mixed law and fact. What are the customs of your district? What rights has the king in your district? Name all the land owners of your district and say how much land each of them has. Name all the persons in your district whom you suspect of murder, robbery or rape' (A Roger guilty of having murdered Ralph? Whether of the two has the greater right to the property in one which Hugh? Did Henry dissesse Richard of his free tenement in Dale? The jury of trial, the jury of accusation, the jury which is summoned here and there to investigate merely in order that the king may obtain information, these all spring from a common root (Pollock & Maitland *Hist Eng Law* I 128)
Concerning the origin of the jury system in its various applications, and esp of trial by jury, much has been written, but the name, in its English form, is thought to date till a *jury* had practically become what it is now, as a grand jury at an assize or at quarter sessions, a common or special jury in a criminal or civil trial, or a coroner's jury at an inquest (see Coroner and Inquest)
In England, juries in all criminal trials, in civil trials in the superior courts, and in writs of inquiry, consist of 12 men, who must be unanimous in their verdict A grand jury and a coroner's jury may consist of any number from 12 to 23, and in these, the verdict of twelve (which is in fact a majority) is sufficient Juries in county courts consist of 5. In Scotland, the number of the jury in a criminal trial is 15, and the verdict of a majority is accepted, in a civil trial the number is 12, as in England, and their verdict must be unanimous.

b *Grand jury*: a jury of inquiry, accusation, or presentment (as distinguished from a petty jury or jury of trial), consisting of from twelve to twenty-three ' good and lawful men of a county ', who are returned by the sheriff to every session of the peace, and of the assizes, to receive and inquire into indictments, before these are submitted to a trial jury, and to perform such other duties as may be committed to them

This body represents the *Grand* Inquest (q v) of earlier times In England its action has by statute and usage become greatly restricted, its principal duty being now ' to examine into accusations against persons charged with crime, and if it see just cause, then to find bills of indictment against them, to be presented to the court ', besides which, however, it may express opinions on changes in judicial procedure, make recommendations on this and kindred subjects, make presentments of nuisances, etc Formerly, a Grand Jury of twenty four was summoned also upon a writ of attaint, to inquire whether a petty jury had given a false or corrupt verdict (abolished by 6 Geo IV, c 50) In Ireland the Grand Jury had, down to 1898, very extensive powers in reference to the general administration of the country In Scotland *grand juries* do not exist

K.

K (kā), the eleventh letter of the alphabet in English and other modern languages, was an original letter of the Roman alphabet, taken from the Greek *Kappa* Κ, originally ϰ, from Phœnician and general Semitic *Kaph* כ Its sound in Greek and Latin was, as in English, that of the back voiceless stop consonant, or guttural *tenuis* But at an early period of Latin orthography, the letter C (originally representing Greek *Gamma*) was employed for the k sound, and the letter K itself fell into disuse, except in a few words, notably the term *Kalendæ* and the prænomen *Kæso*, where the traditional abbreviations Kal. and K kept up the memory of the archaic spelling. But, with the exception of such archaisms, C became the regular Latin symbol of the k sound, and, as such, was substituted for Greek Kappa when Greek words were latinized, as in *Κύμη, Κύπρος, κόμμα, Cūmæ, Cyprus, comma* In late Latin, when the sound of C before a front vowel had become palatalized, or passed over to (tʃ), as in Italian *cento, cittā*, the same fate befell the C of latinized Greek words, such as *Cyrus*, but later Greek words in living (esp Christian) use such as *κῦριε ελεησον* (*κύριε ἐλέησον*), which retained the Greek pronunciation, continued to be written with K To Latin scribes of the sixth, seventh, and eighth centuries, K was thus known as a supplementary letter to C, of use in Greek or other foreign words which had the 'hard' or k sound of C before *e, i*, or *y* Hence it was naturally put to use in the writing of Old High German, Old Saxon, Old Frankish, Early Italian, and some dialects of Old French, in which a k sound came before *e, i*, or *y* In writing these languages, C was usually employed, as in Latin, before *a, o, u*, or finally, but in practice there was considerable overlapping, with the final result that, in German, K ousted C, and is now the proper letter for this sound in that language, as well as in Dutch and all the Scandinavian tongues, while, in French, K was ousted partly by C, partly by Qu, according to derivation (Thus Old Northern French *kanon, karole, katre, ke, ki, kel*, became later *canon, carole, quatre, que, qui, quel*) So 13th c It *ke, ki, perké*, became later *che, chi, perchè*

In the Romano British alphabet, K was, as in Latin, of rare use, and was not adopted as a regular letter in Welsh or Irish, though, as being quite familiar to Latin scribes, it was occasionally written as a casual variant of C In Old English, the original Teutonic k-sound was already in the earliest times fronted or palatalized before original front vowels (not the umlauts of back vowels), and for this variety of sound (kʲ, ky) a distinct symbol was provided in the Runic alphabet Yet, in the OE use of the Roman alphabet, both the guttural and the palatal sound were represented by C, although in the practice of individual scribes K was by no means infrequent for the guttural, especially in positions where C would have been liable to be taken as palatal, or would at least have been ambiguous, as in such words as *Kent, kéne, kennan, akenned, kynn, kyning, kyðed, folkes, cēak, þicke*. But, even in these cases, C was much more usual down to the 11th century, and K can be regarded only as a supplemental symbol occasionally used instead of C for the guttural sound After the Conquest, however, the Norman usage gradually prevailed, in accordance with which C was retained for the original guttural only before *a, o, u, l, r*, and K was substituted for the same sound before *e, i, y*, and (later) *n*, while the palatalized OE. *c*, now advanced to tʃ, was written Ch Hence, in native words, initial K now appears only before *e, i, y* (*y* being moreover usually merged in *i*), and before *n* (=OE *cn-*), where it is no longer pronounced in Standard English, though retained in some dialects Medially and finally, *k* is used after a consonant (*ask, dark, twinkle*), or long vowel (*make, hawk, Isle, speak, week*), after a short vowel, *ck* is used instead of *cc* or *kk*, but the unstressed suffix, formerly *-ick* (*musick*), is now *-ic*, though, when a suffix in *e* or *s* follows, *k* reappears (*traffic, trafficker, trafficking*).

The native K words, being thus confined to Kc-, Ki-, Kn- (with one or two from the dialects in Ka-, Ky-), are a small company But their number is greatly reinforced by the foreign words of recent adoption, many of them very imperfectly naturalized, with which this letter is crowded These include a few modern European words, Germanic or Slavonic, but they consist mainly of names of animals, plants, trade products, and native offices, from Oriental, African, American, Australian, and Oceanic languages The number of these words is augmented by reason of the fact that some of those languages have two, or even three, distinct gutturals, for which, in ordinary English spelling, K has to stand, the combination Kh is similarly put for several fricative and aspirated sounds in Arabic, Turkish, Persian, Hindi, and other tongues (See the individual words, in the etymology of which the actual origin of the letter is stated) In giving these words English hospitality, it was formerly usual to follow English analogies and write C before *a, o, u, l, r, h*, but the more recent tendency has been to favour the use of K in these positions also, giving the non-English initial combinations Ka, Klu, Kl, Ko-, Kr-, Ku-, by which the uncouth or barbarous character of the words is more strongly suggested Thus *cads, Caffre, catgue, Calmuck, Can* (*Chan, Cham*), *cloof, Coran, creese, cummerbund*, now more frequently appear as *kads, Kaffir, kask, Kalmuk, Khan, kloof, Koran, kris, kamarband*

In words from Greek also, many prefer to retain K, instead of latinizing it to C, and this spelling is generally accepted in some words of recent formation, as *kaleidoscope, kamptulicon, katabolism, kinetic, kudos*, while in others, as *kamocize, kakodyle, krasis*, C and K still struggle for predominance In a very few words (not of English formation), K represents Greek χ, esp in the words in *kilo-*, as *kilogramme, kilometre*, etc

1 The letter The plural appears as *K's*, K's, *Ks*, k's (Although now generally pronounced (kēz), the pronunciation (kĭ) was formerly also current)

Kantian (kæntiăn), *a* and *sb* [f the name of the celebrated German philosopher Immanuel Kant (1724–1804) + -IAN]

A *adj* Of, pertaining to, or connected with Kant or his philosophy

Kant's characteristic doctrine was that a critical analysis of our experience discloses (*a*) in logic, that thought actively synthesizes the matter of sense under certain laws ('forms' and 'categories') which are *a priori* determinable as universally valid for and within experience, (*b*) in ethics, that an absolutely valid moral 'law' is similarly determinable, whence the reality of God, Freedom, and Immortality is deducible as 'practically necessary', even though to speculative thought the nature and very existence of the non phenomenal or noumenal must *remain* 'problematic

Hence *Kantian* tends to connote 'apriorism' or 'transcendentalism', viz. the view that certain necessary truths are determinable as implications of our logical and moral experience (R R Marett)

1817 *Edin. Rev* XXVIII 491 Mr Coleridge has ever since been floating or sinking in fine Kantean categories. 1858 W R. PIRIE *Inq Hum Mind* II iv 104 A strong bias in favour of the Kantian metaphysics. 1862 H SPENCER *First Princ* I iii § 15 (1875) 49 Shall we then take refuge in the Kantian doctrine? shall we say that Space and Time are forms of the intellect—*a priori* laws or conditions of the conscious mind? 1877 E. Karyo- (karo), sometimes **caryo-**, combining form of Gr *κάρυον* nut, kernel, employed in a number of biological terms referring to the nucleus of an animal or vegetable cell, esp to changes which take place in its structure The earliest of these were *karyolysis*, *karyolytic* (introduced by Auerbach in 1874) and *karyokinesis* (Schleicher) Those generally recognized are the following

Karyokinesis (-kăniˈsis) [Gr *κίνησις* motion], the complicated series of changes observed in indirect or 'mitotic' division of a cell-nucleus, hence **Karyokinetic** (-kăneˈtik) *a*, pertaining to karyokinesis. **Karyolymph,** the more fluid portion of a cell-nucleus **Karyolysis** (karipˈlisis) [Gr *λύσις*], the dissolution of a cell-nucleus (*Syd Soc Lex* 1887), hence **Karyolytic** (-litˈik) *a* **Karyomito sis** [Gr *μίτος* a thread], separation of the nuclear fibres in the process of cell-division, hence **Karyomito ic, -mitotic** *adjs* **An ryoplasm** [Gr *πλάσμα* thing moulded], the formed substance or protoplasm of the nucleus, nucleoplasm (*Syd Soc Lex*) **Karyorrhexis** [Gr *ῥῆξις* breaking], bursting of a cell-nucleus **Karyosome** [Gr *σῶμα* body], one of the segments into which the fibres of a nucleus break up during karyokinesis

Karyostenosis [Gr *στένωσις* constriction], direct or 'amitotic' division of the nucleus, by simple elongation and constriction, hence **Karyostenotic** *a*

The original meaning is somewhat obscure The prominent sense in OE, as in Low and High German, was that of 'bold, brave, but ON *kœnn* meant only 'expert, skilful, clever', a sense also represented in OF (ODu. *koen*, Kil. *Oost-kün, kyn,*' bold, are app. from LG., the original Scand sense being found in ODa. *torkön* 'learned in the law'.) It has been suggested that the OE sense is the original one, the connecting link with the other being the idea of 'skilled in war', 'expert in battle' (=ON *vígkœnn*), but there is no clear evidence of this. The development of the specifically English sense 'sharp is also obscure.]

The word prob belonged primarily to the vulgar and non literary stratum of the language; but it comes, suddenly, into literary use c 1000, and that in many senses, indicating considerable previous development The original sense may have been 'to lay hold' with the hand, and hence with the attention, 'to keep an eye upon, watch About 1000, it was taken to render *I observare* (orig 'to watch keep an eye upon'), *servare* (orig 'to preserve'), and in subsequent development seems to have been largely influenced by the senses of this I word, nearly all of which it has been used to render It is also rendered the simple *I tendere* (orig 'to watch, observe'), and the compounds *conservare, præservare, reservare* In sense there is also close affinity between *keep* and HOLD orig 'to keep in watch over', 'keep in charge' In many uses they are still synonymous and many phrases which have now the one verb formerly had the other but in later times, *hold, keep* retain the senses of 'keep in close effort to retain, so that *have, hold, keep,* form a series, the members of which pass into each other with progressive intensity of grasp *Hold* has moreover often a sense of 'sustain support, keep from falling', not belonging to *keep*

If *cēpan* was an old word, it would go back to an OTeut **kēpjan*, but no trace of this wk. is found elsewhere Some compare OE. *copian* (found only once) = I 'compilare', and MHG. *kopfen* to watch or wait for, but uncertainly is to be length of the a in the latter words makes it doubtful whether they belong to the root *kēp* Kluge (Beitrage VIII 537) has suggested radical connexion with OHG. *chuofa*, OI. *kōfa* cabin, prop 'place for holding, or keeping.' The allied Flem *kepen* in Kilian is an error

Uncertainty as to the original sense makes a historical scheme of the several development difficult In the following, some early (and obsolete) senses are placed first under branch I branch II has the chief or its senses,* prop after ion obtained. † obs. ‡ obs. rare. III the intransi senses derived from these, IV the combinations with adverbs Although the four principal divisions are clearly based on the primary and literal senses, the distinction tends to melt away in the fig uses, and exp in the immumer ble phrases, in which exp pressions into which *keep* enters, in several cases these combine the notions of two or more groups In many phrases, also, the sense of *keep* is so indefinite and so dependent upon that of the object or complement, as to be scarcely capable of separate analysis, such phrases are treated under the sb or adj in question e g *keep* COMPANY, *keep* WATCH, *keep* CLOSE]

The mod pronunciation (*kī*) is abnormal The other OE. words are *cæg-bora* (keeper of the keys), *cæg-hus* (prison), *cæg grey, grey, Anteg* wkey; and that *key* had the same vowel as these in ME. is proved not only by the frequent spelling *kay*, but by its constantly rhyming with *way, assay, play*, etc. This was evidently the standard pron. down to the close of the 17th c., Dryden has the rime with *tray* more than once in one of his latest works (1700) On the other hand, we find even in 15th c. a (northern) spelling *kee*, and in Scottish MSS of the same cent the form *key* (pl. *keys*) shows the vowel in that division not the same as in *day* or *clay*, in somewhat later Scottish (16th–17th c) the identity of the vowel with that which gives mod (*i*) is established by rimes. In mod. Southern Sc. also, *key* has the same diphthong (*kei*) as *fe, me, we, dee, see, tree*, etc., proving that it must from an early period have had the same vowel as these, but not as *bed* at the time. *Key* is also the same history in Sc. (*wi*), but in Eng remains (*wī*) The mod pronunciation (*kī*) thus appears to be of northern origin, and the result of a difficult to explain change in the Saxon Eng use. Kimbo, obs. form of Kemb *v.*

Kimberlite (ki·mbərləit) *Min* [Named, 1886, from *Kimberley* in Cape Colony + -ite 2 b.] The eruptive rock, or 'blue ground', which is the matrix of the diamond at Kimberley and elsewhere in South Africa, it occurs in cylindrical 'pipes', often having a diameter of several hundred feet, and of unknown depth.

1887 H. Carvill Lewis in *Papers on the Diamond* (1897) 50 There appears to be no mineral rock type having in one the composition and structure of the Kimberley rock. It is now proposed to name the rock *Kimberlite*. Kimberlite is a rock *sui generis*, dissimilar to any other known species. 1897 *Ann Rep Amer* 329 In the blue rock—named Kimberlite by Professor Carvill Lewis—is found a dull green tint, due to its impregnation with iron oxides.

†b In this sense, chiefly in a genitive phrase, dependent upon following *sb* Cf KIND *sb* 14

In OE the genitive might be either sing or pl, according to sense, e g *gelic cynnes* (*cynnes*) *gehwilc* consisting of each or every kind, *manigra cynna scipu*, ships of many kinds, *þreora cynna treowu*, trees of three kinds In ME, *cynnes* became *kunnes*, *gynnes*, *kynnes*, *kynne* and genitive *kunne*, *kynne*, *kyn*, *kin* For the latter the genitive sing was often substituted, and conversely, *kynne*, *kin*, appeared in the sing, esp in the phr *kin and kind* (KIND *sb* 15), and as an unnflected genitive, as in *man son, fader broder*, etc The preceding adjectival word agreeing with *kynnes*, *kinn*, dropped its grammatical inflexion early The form was transferred to *kinnes*, thus *alle skynnes* (= *alles kynnes*, *alle kynnes*), *no skynnes*, etc Usually however the two words were at length combined, as in the later forms *askinis*, *anykinis*, *fele kinis*, *manykinis*, *nokinis* or *nakinis*, *otherkinis*, *seve kinis*, *swilkinis*, *same kinis*, *thiskinis*, *whilk kin* (*kind*, *kyn*), *wokinis* Few of these came down to 1500, though in the north *whatkin* is found in the 16th c, and survives in NC and north Eng as *what's*, beside *ocean* from *swilk kin*

The reduction to an invariable uninflected form may have been assisted by the equivalent use of *manere* (MANNER) from OFr, which it thus found, as *three manner men* = men of three kinds or sorts In this, at an early period, we find of inserted: *an manere of fisce*, *al manere o snut spices*, the syntactical relation between the words being thus reversed, and although this appears to have rarely extended to *kin* itself, it affected its later representative *kind*, also *sort*, *species*, etc, so that we now say 'all kinds of things' = things of all kinds. This may have been facilitated by the fact that in the order of the words (as distinct from their syntactical relation) 'al kin things' is more closely represented by 'all kinds of things' than by 'things of all kind'. Vol. V.

kin, found as early as 1250 (*O E Misc* 188–191), and evidently then in familiar use These and others of the kind were no doubt common in 13–14th c (for *Jankin* and its variants see Nicholas' *Pedigree of Chaucer*), but are not prominent in literature till the second half of the 14th The A text of 'Piers Plowman' has *Malkin* and *Perkin*, the B text adds *Hankyn*, and the C text *Watkyn*, Chaucer uses *Jankin, Malkin, Perkin Simkin*, and *Wilkin* 1 and in the 'Tournament of Tottenham' there occur *Davykyn, Hawkyn, Tegrykyn, Perkyn*, and *Jonekyn* The Earliest English Wills have *Idkyne* (1497), *Jankyn* (1417–22) and *Watkyn* (1433) As Christian names these seem to have mostly gone out of fashion with the 16th century, instances occur later (e g *Wilkin* in Lyndesay's 'Satyre', 2180) most of them have, however, survived as surnames, usually with the addition of *-s* or *-son*, as *Jenkins, Wilkins, Wilkinson, Dickens, Dickinson*, etc

Instances of the suffix being added to common nouns in the 14th c are rare, but Langland has *bundekin, pharisekin*, and *fendekin*, perhaps on the analogy of the personal names Other words in *-kin* from the same or immediately succeeding period are either adopted from Dutch or are of obscure origin; and it is doubtful whether the ending was in every case felt as a diminutive such are *bannikin, bodkin, buckin, firkin, kilderkin, manikin* Considerable obscurity attaches to many later words (16–17th c) of the same type, as *perkin, pumpkin, pipkin, gaskin, gerskin, bumkin, gherkin, napkin, pilkin*, etc in some of these the ending is that of different origin or due to assimilation, as in *pumpkin, tamkin* for earlier *pumpion, tampion*. Apparently from Du are the words *mannikin, cannikin, catkin*, and *mannikin* Outside of these and some forms used in oaths, as *lakin* for *ladykin*), *bodykin, pittikin*, the suffix is comparatively rare, the only example which has obtained real currency is *lambkin* (1570), though a few others are occasion ally employed, as *boykin* (1542) *doe-kin, gosling, lambkin*, and nicknames such as *gillykin, hoodkin, handkin* (after *mannikin*) *Bootskin* (18th c.) is not clearly a diminutive in origin, and *cockalorum, thumbikin* (cf also *greenkin*) the force of the suffix is different.

14 **Kind of** Later usage transposes the syntactical relation in such constructions as *all kinds of trees* = 'trees of all kinds', *this kind of thing* =

a thing of this kind' For the history of this, see KIN 6 b.

As the original genitive phrase was fi attrib relation to be following sb, the natural tendency is still to treat *all kind of, no kind of, what kind of*, etc. (like *M*= *allan nakin, whatkin*), and, hence also, the simple *kind of* (collog *kind a, kinda, kinder*), as an attrib or adj phrase qualifying the sb Hence the uses in b, c, d

c1400 K. b The feeling that *kind of* was equivalent to an adj qualifying the following sb, led to the use *all, many, other, these, those*, and the like, with plural verb and pronoun, when the sb was plural, as in *these kind of men have been wise* This is still common colloquially, though considered grammatically incorrect

(Of the ME use of *alkin, manykin, sercken*, etc. see Kin in quot 1648, *other kind* is for the earlier *other kin*)

c *A kind of* A sort of, a (person or thing) of kind, an individual that is, or may be, included in the class in question, though not possessing its all characteristics

A kind of gentleman and *a gentleman of a kind* differ i that the former expresses approach to the type, admitting allure to reach it, while the latter emphasizes the non-realisation of the individual Hence, *a kind of* may be used as a saving qualification, as in 'a kind of knave'

1873 W. K. Clifford *Pure Sciences in Contemp Rev* (1879) Oct 717 These rules are called the laws of kinematics, or the laws of motion of rigid bodies

Kinematical (kainĭmæ·tikăl), *a* [f as prec + AL] Of or pertaining to kinematics, kinematic

1864 in WEBSTER 1879 THOMSON & TAIT *Nat Phil* I i § 91 I have used kinematical curves, which give good instances of kinematical theorems 1884 *Health Exhib Catal* 143/2 Kinematical Apparatus

Kinematics (kainĭmæ·tiks) [In form a pl of KINEMATIC see IC 2, and quot 1840.] The science of pure motion, considered without reference to the matter or objects moved, or to the force producing or changing the motion (Cf KINETICS)

1840 WHEWELL *Philos Induct Sc* I 146 Ampere, in his Essay on the Philosophy of the Sciences, has proposed to term it Kinematics (*Cinématique*) 1859 [R. LEANE *Motion* v, The phenomena of Motion — what has hitherto been called Dynamics, but more correctly Kinematics] 1879 THOMSON & TAIT *Nat Phil* I i § 351 If, from any one configuration, two courses differing infinitely little from one another have again a configuration in common, this second configuration will be called a kinetic focus relatively to the first or these two configurations will be called conjugate kinetic foci 1881 STEVENSON *Light Pharmacy* (ed 2) 113, I will remember that the spinning of a top is a case of Kinetic Stability

B *sb*, = KINETICS

1873 CLIFFORD *Syllabus Lect* in *Math Papers* (1882) 516 Dynamic is divided into two parts, Statics and Kinetic. Properly speaking, Statics is a particular case of Kinetic which it is convenient to consider separately

Kinetical (kainĕ·tikăl), *a* [f as prec + AL] Of or pertaining to kinetics

1882 MINCHIN *Unipl Kinemat* 107 D'Alembert in enunciating the kinetical principle known by his name, speaks of force of inertia as if it were a force 1891 TAIT *Introduce* here a proposition which is not kinematical but kinetical

Kine·tics. [In form a pl of KINETIC see IC 2] The branch of dynamics which investigates the relations between the motions of bodies and the forces acting upon them, opposed to *Statics*, which treats of bodies in equilibrium

1864 in WEBSTER 1866 *Lond Rev* 2 June 615/2 Between which he has his kinetics to get up for the next morning 1882 MINCHIN *Unipl Kinemat* 54 The particular case in which the resultant acceleration of a moving point is always directed towards a fixed centre is deserving of special notice on account of the part which it plays in kinetics.

(The genitive plural is usually *kinga* (— *-ena*, *-an*)

I 1. The usual title of the male sovereign ruler of an independent state, whose position is either purely hereditary, or hereditary under certain legal conditions, or, if elective, is considered to give to the elected the same attributes and rank as those of a (purely or partly) hereditary ruler

In OE. the title appears first as the name of the chiefs of the various Anglian and Saxon 'kins' tribes, or clans who invaded Britain, and of the petty states founded by them, as well as of the native British chiefs or princes with whom they fought, and of the Danish chiefs who at a later time invaded and occupied parts of the country Among the Angles and Saxons the kingship was not strictly hereditary according to later notions, but the *cyning* was chosen or accepted in each case from a recognized kingly or royal race or family usually from the descendants, up to Woden, of the gradual ascendancy and conquests of Wessex in the 9th and 10th c, the king of the West Saxons became the king of the Angelcynn, Anglebeod, English (*Angelcynnes cyning*, *gentis Anglicanæ*, *Anglorum*), and the tribal kings came to an end But there still remained a King of Scotland, and several petty kings of Ireland In European and other more or less civilized countries, *king* is now the title of the ruler of an independent organized state called a *kingdom*, but in mediæval times as still in the Turkish Empire, some *kings* were really or nominally subordinate to the Emperor as ostensibly representing the Roman *Cæsar* or *Imperator*), and a King is said to rank below or Emperor In reference to ancient times the name is applied, like L. *rex*, Gr *βασιλεύς*, Heb *מלך* *melek*, to the more or less despotic rulers not only of great dominions like Assyria, Persia, Egypt, but of petty states or towns such as Jericho, Ai, Mycenæ, Ithaca, Syracuse, and Rome It is still applied to the native rulers of petty African states, towns, or tribes, Polynesian islands, and the like

A the approach of the breeding season, the lower jaw of the male salmon becomes hooked upward with a sharp antagonistic beak known as the *kip*, which is used as a weapon by the fish when two or more fight for the same female; from this 'kip', the name 'kipper' is commonly explained: but this is not compatible with the identity of *kipper* and OE *cypern*, Mdr. *kypre*, which, itself, though phonetically unobjectionable, is also unproved, since the exact sense in which these words were used does not appear from the context Moreover, in the quots of 1376 and 1533–4 in B 1, *kipper* appears to include both sexes]

A *sb* 1 A name given to the male salmon (or sea trout) during the spawning season (The female is then called a *shedder*)

Some recent writers give as the meaning 'the male salmon when spent after the spawning season', thus making the term equivalent to KELT, but this is not borne out by the earlier instances, which, when clear, evidently relate to the time when the fish is full of milt, and needs protection on account of its breeding value, nor does it harmonize with some later authorities, e g Jamieson, who says, '*Kipper*, salmon in the state of spawning'; it is directly challenged by some (of quot. 1879), and it seems to have arisen from misapprehension of such qualifications as 'unwholesome', 'out of season', carelessly applied to fish from the approach of the spawning season. For this Pennant seems largely responsible see quot 1766 in B 1

The history of the word in English is not clear The verb itself is not found before the time of the *Catholicon*, 1483, and it is now used dialectally from Scotland to East Anglia Hence it might, as well as the sb. *kitlynge* in Hampole, *c* 1340, be of Norse origin But the *kitelung* occurring once in a late OE gloss (*c* 1000), naturally suggests an OE sb **kitelcun*, which could only stand for **cytelinn*, parallel to the OHG form in *-izzezzôn*. But the form **cytelian* = OS. *cutilôn*, would not have been written with *k*, and would have given ME. **chittle* It thus remains uncertain whether *kittle* the idea and locality of which are consistent with Norse derivation, is of Scandinavian or OE origin]

3 With genitive, or poss pron A military servant or follower (of a king or some other specified superior); later, one devoted to the service of a lady as her attendant, or her champion in war or the tournament, hence also *fig*, and even applied to a woman (quot 1599)
This is logically the direct predecessor of sense 4, the 'king's knight' having become the 'knight' *par excellence*, and a lady's knight being usually one of knightly rank

4 Name of an order or rank a. In the Middle Ages Originally (as in 3), A military servant of the king or other person of rank; a feudal tenant holding land from a superior on condition of serving in the field as a mounted and well-armed man In the fully-developed feudal system One raised to honourable military rank by the king or other qualified person, the distinction being usually conferred only upon one of noble birth who had served a regular apprenticeship (as page and squire) to the profession of arms, and thus being a regular step in this even for those of the highest rank b In modern times (from the 16th c.) One upon whom a certain rank, regarded as corresponding to that of the mediæval knight, is conferred by the sovereign in recognition of personal merit, or as a reward for services rendered to the crown or country
The distinctive title of a knight (mediæval or modern) is *Sir* prefixed to the name, or 'Sir John Falstaff' *Knight* (also *knight bachelor* or *K B*) may be added, but is now somewhat unusual A knight who is not a member of any special order of knighthood (see 12 b below) is properly a *knight bachelor* (see BACHELOR 1 b) Various ceremonies have at different times been used in conferring the honour of knighthood, esp that of the recipient kneeling while the sovereign touches his shoulder with the flat of a sword; knights of the higher orders are now frequently created by letters patent In point of rank the medi eval knight was inferior to the earl and baron; modern knights rank below baronets, and the dignity is not hereditary
In early use the *Knights*, as the type of the military profession with its characteristic virtues, are often spoken of in point of rank with *king* The characteristic qualities expected in a knight, as bravery, courtesy, and chivalrous conduct, are constantly alluded to, and the name is used with *lady*, *as a good knight*) often implied these qualities as well as the mere rank

(*gē)cnēow*, pa pple (*gē)cnāwen* = OHG. *-cnâan*, *-cnâan*, *-cnâwan* Orm pres. ind 1st pl. *knæȝnn*, Gothic type **knâan*, **kaikniô*, **knâsan*, a redupl vb not found in existing remains Outside 1 cut, = Oslav *zna-ti*, Russ *znat* to know, 1 ***gnō-*, whence the inceptive (*g)nōscĕre*, perf (*g)nōvi*, pa pple (*g)nōt-us*, Gr ***γνω-*, whence redupl and inceptive γι-γνώ-σκω, 2 nor ***γνω-ο-*, Skr *jnâ-know* Generally held to be from the same root (*gen-*, *gon-*, *gn-*) as CAN *v* , and KEN Already in early times the simple vb had sustained various losses, in L and Gr the pres. stem survived only in derived forms, in Gothic the word is not recorded, in ON the pres inf was obs., in ON and OHG the orig strong pa t and pa pple. were lost, in OHG and OS the pa pple was app known only in composition, as in OE *gecnāwan*, *oncnāwan*, *tōcnāwan* The first of these may be considered as the historical ancestor of ME and mod. *know*, for although it came down in southern ME as *i knowen*, *y knowe*, the prefix was regularly dropped in mid and north, giving the simple stem form *cnauen*, *knawe(n*, *knowe(n*, which was well established in all the main scribes by 1200 (a single instance being known *a* 1100) The verb has since had a vigorous life, having also occupied with its meaning the original territory of the vb. WIT, Ger *wissen*, and that of CAN, so far as this meant to 'know' Hence Eng *know* covers the ground of Ger *wissen*, *kennen*, *erkennen*, and (in part) *können*, of Fr *connaître* and *L. noscere*, *cognoscere*, and *scire*, of Gr γιγνώσκειν and εἰδέναι (*οἶδα*) But in Sc the verb KEN has supplanted *knaw*, and come to be the sense-equivalent of 'know' in all its extent of signification As *gecnāwan* came down as late as 1400 in form *cknowen* KNOW, the pa. pple in r-, *y-*, in southern ME, may belong to either form

Signification From the fact that *know* now covers the ground formerly occupied by several verbs, and still answers to two verbs in other Teutonic and Romanic languages, there is much difficulty in arranging its senses and uses satisfactorily However, as the word is etymologically related to Gr γιγνώσκω, *L (g)nōscĕre* (*g)nōvisse*, *F connaître* (—*L cognōscĕre*) to 'know by the senses', Ger *kennen* and *können*, Eng *can*, *ken*, it appears proper to start with the uses which answer to these words, rather than with those which belonged to the archaic vb. to WIT, Ger. *wissen*, and are expressed by L. *scire* and F *savoir*, to 'know by the mind' This etymological treatment of the word, and the order in which it has been put, differs essentially from a logical or philosophical analysis of the notion of 'knowing', and of the several forms and phrases by which this is expressed, in which the word 'know' is taken as an existing fact, without reference to the history of its uses.

Know, in its most general sense, has been defined by some as 'To hold for true or real with assurance and on (what is held to be) an adequate objective foundation' Mr James Ward, in *Encycl Brit* XX 49 s v *Psychology*, assigns to the word two main meanings 1 to *know* may mean either to perceive or apprehend, or it may mean to understand or comprehend Thus a blind man, who cannot *know* about light in the first sense, may *know* about light in the second, if he studies a treatise on optics' Others hold that the primary and only proper object of knowing is a fact or facts (as in our sense 10), and that all so-called knowing of things or persons resolves itself, upon analysis, into the knowing of certain facts about these, as their existence, identity, nature, attributes, etc., the particular fact being understood from the context, or by a consideration of the kind of fact which is usually wanted to be known about the thing or person

in question Thus, 'Do you know Mr G ? ,' 'Do you know Balliol College?' have different meanings according to the kind of facts about Mr G or Balliol College, which are the objects of inquiry

[*Note* The origin of *knowledge* sb. and vb. and the question of the original relations between the sb. and vb. themselves are a difficult problem. According to the extant evidence the vb. is exemplified nearly a century before the sb., and is found only in southern Eng., with a form in *lechen, leche*, while the sb., when it appears *c* 1300, is found only in northern dialect, and has its earliest form in *-leche*. Then the northern MSS of *Cursor Mundi* have numerous example of the sb.—the earliest known,—but do not use the vb. Later in the 14th c. the sb. is found in midl. and south. (Trev.) Wyclif, a northern man, with the forms *lache, leche*, i the 15th c. the vb. appears sparingly in the north, with th form *lage, lege*. If the sb. were at first only northern the want of earlier examples may be explained by ther being no northern literature of the 14th and early 15th c but this does not account for the vb. in the south-west of the south southern literature before Wyclif, and leaves the earl relations between the vb. and sb. very perplexing. It ca hardly be doubted, in view of the relief-sense of both, th they have a common origin; but what this was it is no easy to determine. The sb. has no parallel in Eng., no appa in any Teutonic lang. Some have referred it to the related ONorse derivative sbs. in *-leikr*, play, exercise, action e. g. *kunnleikr* knowledge. The OE cognate ending was *-lāc*, as in *wedlāc*, wedlock; but neither the OE nor ON form could have given an early ME *leche*, this would have required an OE *-lēc*, of which there is no trace. I on the other hand, we adopt the vb. as Northern, there are difficulties in explaining the formation of this sb. It has been proposed to associate it with OE. verbs i *-lǣcian*, pa. t. *-lǣcode*, a few of which came down as earl ME. in *-lechen, -lēche*. In OE. these usually no wit derivative adjs. in *-lāc* (from an adj. or sb.), to which the are supposed to stand in relation of vb. to sb., as *wōdlāc, wōdlic* friendly, *endelæcan* be friendly with, to treat like friend, *gemēlic* equal, *gemēlæcan* to make equal, mutual *mēdlic* meet, *mēdlæcan* to draw nigh, approach, *wintrlic* right, correct, *gerihtlæcan* to make right, correct *sumorlic* summerlike, *sumorlæcan* to draw near to summer, *winterlic* wintery, *winterlæcan* to draw near to winter, etc. Here the radical part is an adj. or sb. If now early ME. *cnaw* Know sb.), acknowledgement, confession', went back to OE. *cnāwlāc*, it is possible that a verb immediately in analogy, or through an adj. **cnēwlīc* (cognate with scious of, acknowledging, there was formed a derivativ sb. **cnēwlǣcnes* 'to become conscious of, make acknowledgement or confession of', which would give an earl ME. **cnawlechen, -lehte*. Thus, these are not the ME forms actually found, but some variation of them. Examples of these verbs appears in the instances cited by Stevens (*Aegis Grum.* ed. 3, § 407, Ann. 17, 18), including a pa. ppl. *gecnēhtlæced*, in the West Saxon *Past Care*, besides *gecnēhtlēh* while the Rushw copy of the Landsfarne Gloss shows, for *mēahlæcan*, a form *mēhlegā*, pa. t. *mēhlecade, mēahlecade*, pa. ppple *gemēhlecad*. In early ME. we have *knawlechen, cnowlechen, lechede*, may be taken as having the origin. If this was so, the verb to *knowledge* was first formed, and the sb. was derived from it, which would also agree with the extant historical data for the two words, and account for the original sense of the sb.]
